

The Structure of the Earth

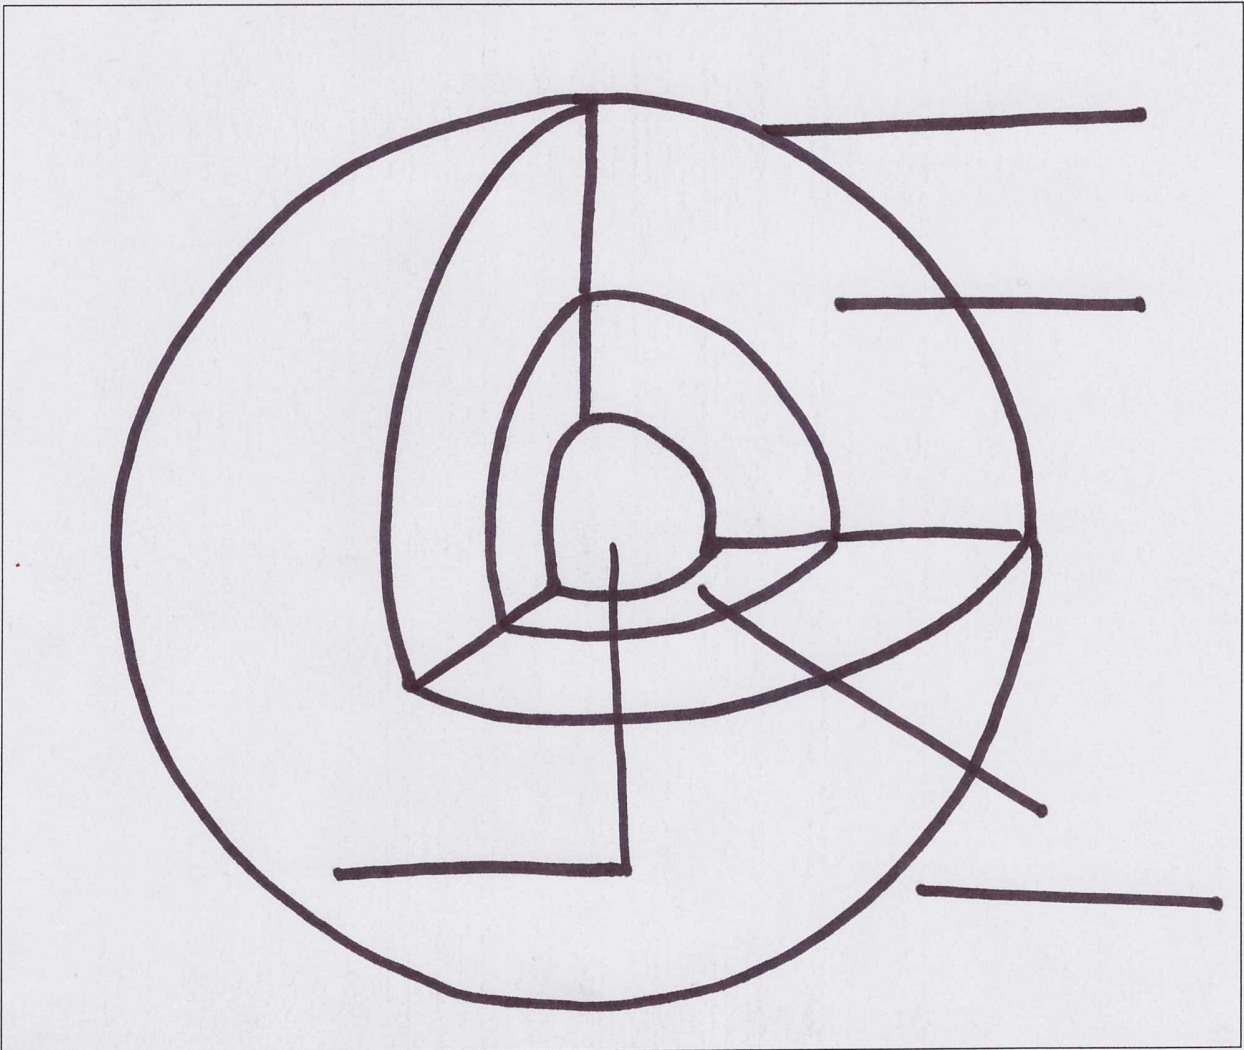

The Earth is made up of four distinct layers. Label the diagram below using these words and then match the words with the correct definition:

CRUST

INNER CORE

MANTLE

OUTER CORE

_____ is the hottest part of the Earth and is solid, made up of iron and nickel.

_____ is the layer surrounding the centre and is liquid metal, made up of iron and nickel.

_____ is the widest section of the Earth and is made up of semi-molten rock called magma.

_____ is the thinnest and outer most layer of the Earth, made up of solid rock.
