

# Weather Instruments

Can you match the weather instrument listed on the left with its job on the right?

Anemometer

Measures air pressure

Barometer

Measures weather conditions high in the atmosphere.

Hygrometer

Measures wind speed.

Rain Gauge

Photograph large scale air movements from space.

Satellites

Measures the amount of rain that has fallen over a specific period of time.

Thermometer

An instrument that shows which direction the wind is blowing.

Weather Balloon

Measures the air temperature

Wind Vane

Measures moisture content in the air
